PROFESSIONAL SUMMARY

Product and Strategy Leader with over **6 years of experience** driving automation initiatives, GenAI-integrated internal-use products leading to operational excellence. Proven expertise in architecting "0 to 1" journey of **GenAI enabled products, hypothesis testing and leading complex platform migrations** that resolve deep-seated technical debt **across the travel and banking sectors**. Successfully led complex technical projects at Agoda and Citibank, **delivering multi-million-dollar cost savings and significant organizational efficiency**

WORK EXPERIENCE

Project Manager, Lead – Agoda (CEG) **Jan 2023 – Current**

- **AI-First Transformation Strategy:** Spearheaded the strategic vision to redefine Agoda's customer support through a GenAI-first lens, orchestrating 25+ projects that transitioned manual operations into automated, intelligent agent workflows with document and email automations
- **Managing a team of 2** delivering efficiency targets of **~6% cost savings (USD ~5.4M) via A/B Experimentation on workflow automation**, process improvement & GPT based email handling
- **Owned strategic development of 36+ projects** including Date Change & Cancellation workflows, delivering API development, systems migration and CX oriented projects with GenAI
- Led the delivery of a unified service ecosystem by **integrating multiple siloed internal and external systems** (Eg. Genesys) into a centralized CMS, streamlining operational workflows across remote teams and significantly **reducing agent context-switching latency by ~5% Y-o-Y**
- **Improved CSAT scores by ~10%** QoQ by implementing Customer Urgency framework at same cost
- Led the **implementation of a centralized QA process** to validate production GenAI workflows

Analyst, Citibank N.A (Treasury & Trade Solutions – C10) **Jul 2021 – Dec 2022**

- **Designed and implemented end-to-end SOX framework** for Trade Risk & Control Team and its financial products (Import/Export Trade Loans, Letter of Credit) to meet Compliance standards
- Launched 4+ RPA enabled automations and UX design projects for Equity Trade Settlement team to enable migration to T+1 stock delivery and quicker fund reconciliation

Graduate Engineer, NatWest (RBS) **Jul 2018 – Jun 2019**

- Streamlined internal ETL workflows and BI reporting for General Ledger team using Oracle DB
- Recognized with RBS Living Our Values award for leading 3 initiatives of the Analyst program
